PRODUCT FEATURES

- Highly purified, resorbable collagen material.
- Provides rapid hemostasis and clot stabilization.
- Conforms to wound architecture for secure fit.
- Supports angiogenesis and soft tissue regeneration.
- Naturally resorbed, eliminating need for removal.

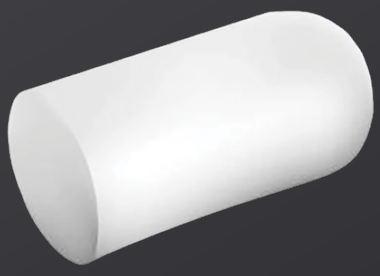

INDICATIONS FOR USE

- Extraction socket management.
- Coverage for small surgical or biopsy wounds.
- Protection of grafted or non-grafted sites.
- Minor oral wound management.
- Can be compressed and used over extraction socket with particulate graft.

HANDLING / PRECAUTIONS

- Place directly into the wound or socket.
- May be sutured to enhance stability.
- Avoid excessive pressure to preserve natural structure.
- Do not use in patients with collagen hypersensitivity.
