ORADAPT

Collagen Membrane

Surgical Esthetics®

OrAdapt® is a versatile resorbable collagen membrane engineered for oral and periodontal regeneration. Its pli–ability allows it to conform to complex defect geometries, while its barrier properties facilitate predictable healing.

PASSIONATE ABOUT REGENERATION

PRODUCT FEATURES

- Derived from highly purified porcine collagen.
- Excellent biocompatibility and tissue integration.
- Can be used in both periodontal and implant-related procedures.
- Predictable resorption time frame supporting tissue regeneration.
- Thin, pliable structure for easy adaptation.

INDICATIONS FOR USE

- Periodontal regeneration in intrabony and furcation defects.
- Extraction socket preservation.
- Guided bone regeneration.
- Bone graft coverage in implant dentistry.

HANDLING / PRECAUTIONS

- Hydrate in sterile saline before use.
- Handle gently with dry or PRF instruments.
- Completely cover defect and graft material for optimal barrier function.
- Not recommended in patients with known porcine collagen sensitivity.
