OSSIFY

Allograft particulate syringe

OSSIFY™
ALLOGRAFT PARTICULATE SYRINGE

Surgical Esthetics®

The Ossify Allograft Particulate Syringe delivers 0.25–1mm mineralized cortical/cancellous allograft with precision and ease. The pre-loaded syringe features a filter cap for seamless chairside graft hydration. An osteoconductive scaffold that maintains space and resorbs as host bone remodels

PRODUCT FEATURES

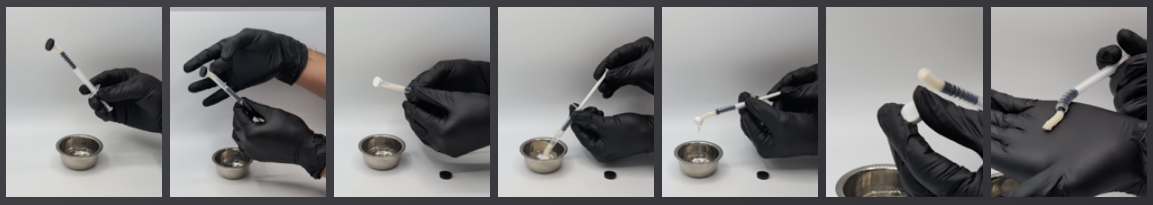

- ✓ 0.25–1mm mineralized cortical/cancellous allograft particulate
- ✓ Convenient syringe delivery system for precise placement
- ✓ Osteoconductive scaffold for new bone formation
- ✓ Pre-loaded for chairside efficiency — no mixing or transfer required
- ✓ Resorbs as new bone remodels
- ✓ Maintains space and defect fill
- ✓ Filter cap facilitates two-way liquid movement for easy graft hydration

COMMON USES

- Extraction socket preservation and ridge augmentation
- Implant site development and peri-implant defect filling
- Guided bone regeneration (GBR) procedures
- Sinus floor elevation
- Periodontal and intrabony defects

HANDLING

CODE	VOLUME
SY-MCC-012050	1 x 0.5cc
SY-MCC-012100	1.0cc (2 x 0.5cc)
