# PERISHIELD
## Pericardium Membrane

PERISHIELD®
PERICARDIUM MEMBRANE

Surgical Esthetics®

Perishield® is a natural pericardial–derived collagen membrane with prolonged resorption. Multi–layer structure provides handling and strength for large/demanding regenerative procedures.

## PRODUCT FEATURES

- Intact pericardium with minimal processing.
- Extended resorption.
- Strong/tear-resistant and resistant to collapse.
- Suturable/tackable.
- Supports vascularization and bone regeneration

## INDICATIONS FOR USE

- Large/complex GBR & GTR.
- Ridge augmentation (horizontal/vertical).
- Sinus augmentation and peri-implant defects.
- Defects requiring extended space maintenance.

## HANDLING / PRECAUTIONS

- Hydrate before application to enhance flexibility.
- Can be sutured/pinned/tacked for fixation.
- Avoid over-manipulation to preserve integrity.
- Contraindicated in patients with hypersensitivity to collagen or bovine materials.

| CODE | SIZE |
|---|---|
| OPCM10X10 | 10x10mm |
| OPCM15X20 | 15x20mm |
| OPCM20X30 | 20x30mm |
