REGENAFILL
Bone Graft Plug

REGENAFILL® BONE GRAFT PLUG | Surgical Esthetics®

BONE GRAFT PLUG WITH 80% MINERAL CONTENT

... IT'S SO EASY, IT'S PLUG AND PLAY

REGENAFILL™ Bone Graft Plug combines purified collagen with mineralized bone particles in a convenient plug form. It simplifies socket grafting by providing both a scaffold for clot stabilization and osteoconductive particles for bone regeneration.

PRODUCT FEATURES

- Composite plug with collagen and mineralized bone graft.
- Provides hemostasis, clot stabilization, and bone regeneration in one product.
- Easy-to-place cylindrical design for extraction sockets.
- Osteoconductive properties support new bone formation.
- Naturally resorbs as new bone is remodeled.
- 80% carbonate phosphate with a carbonate apatite structure that is comparable to the matrix of human bone.

INDICATIONS FOR USE

- Extraction socket preservation.
- Ridge maintenance prior to implant placement.
- Small localized bony defects.
- Alveolar ridge augmentation in minor procedures.

HANDLING / PRECAUTIONS

- Place directly into extraction site; hydrate with sterile saline if desired.
- Avoid overpacking to maintain natural porosity.
- Secure with sutures or a membrane for additional stability if needed.
- Contraindicated in patients with collagen or allograft material sensitivity.

CODE	SIZE
RFP6X25	6X25MM (5 PACK)
RFP10X20	10X20MM (5 PACK)
